

TONY BASKAR Y

Software Developer | Full Stack Developer | Python Developer

9894547420 | tonybaskar83@gmail.com | linkedin.com/in/tony-baskar-y-55a2282a7 | tonybaskar.github.io

PROFESSIONAL SUMMARY

Results-driven Software Developer with hands-on expertise in Python, Full Stack Web Development, and Computer Vision. Proven ability to build real-world applications, lead technical teams, debug complex systems, and deliver production-ready software. Passionate about clean code, efficient architectures, and impactful development.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, C, SQL, PL/SQL

Web & Databases: HTML5, CSS3, Bootstrap, AJAX, React.js (Basics), MySQL, SQLAlchemy, Jinja2, Google Firestore

Frameworks & APIs: Flask, REST API, QR Code Integration, WhatsApp API, Chart.js

AI / CV: OpenCV, MediaPipe — gesture recognition, real-time CV pipelines, AI Analytics

Tools: Git, VS Code, Figma, Android Studio, Canva, MS Office

PROFESSIONAL EXPERIENCE

Technical Trainer & Trainer Lead — KGiSL Million Genius Coders

- Delivered hands-on software development training in Python, Java, HTML, CSS, and JavaScript; guided students through real-time project development, debugging, and application deployment.
- Led trainer coordination, batch management, and technical QA — enforcing coding standards and ensuring consistent, measurable outcomes across all cohorts.

Resource Person — National Level Figma Workshop — Sacred Heart College, Tirupattur | Feb 2026

- Conducted expert sessions on UI/UX design, Figma prototyping, and wireframing for 100+ participants, emphasizing modern web design and user-centered product thinking.

SOFTWARE PROJECTS

FitCore ERP – AI-Powered Gym Management CRM & ERP | Python, Flask, HTML5, CSS3, JavaScript, Bootstrap, MySQL, SQLAlchemy, Jinja2, REST API, QR Code, WhatsApp API, Chart.js, AI Analytics

- Built a complete Gym CRM & ERP platform streamlining memberships, attendance, QR check-ins, payments, trainer management, workouts, and diet plans.
- Implemented lead tracking, multi-branch operations, analytics dashboards, and AI-powered business insights to help gyms grow efficiently.

AI-Based Volume Control | Python, OpenCV, MediaPipe

- Built a real-time gesture-controlled system volume application using hand landmark detection — optimized for low-latency inference across varying lighting conditions.

Mark Entry System | HTML5, CSS3, JavaScript, PHP, MySQL

- Engineered a responsive full-stack academic management platform with CRUD operations, dynamic data validation, and normalized relational database schema.

Freelance Web Services Platform | Full Stack

- Designed and deployed a full-stack service management platform for freelance business operations, integrating dynamic frontend UI with server-side logic and database-driven content.

EDUCATION

MCA (Pursuing) — Indira Gandhi National Open University (IGNOU)

B.Sc. Computer Science — Sacred Heart College (Autonomous) | CGPA: 8.57 | 93% Final Semester | 100/100 Practicals | LIC Best Student Award

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- NPTEL — Programming in Java (Elite + Silver | Top 5%)
- Full Stack Development — Sacred Heart College
- Selenium Automation Using Java — GeeksforGeeks
- Mobile Application Development — Sacred Heart College

Achievements:

- 1st Place — Java Debugging, National Level IT Symposium
- 1st Place — Wobbling Minds, BOS.CON 2K25
- 3rd Place — Code Blaster, KMG College of Arts and Science
